**My Contribution:** (e.g., specifying the part(s) you contributed most, organizing group meetings, etc)

Research popular chat app features, define user authentication and registration process, create view

general layouts, implement user authentication and authorization, write unit tests for authentication and

messaging, document the project architecture and codebase

**Comments of Other Group Members:** (e.g., why the percentages are not equally distributed)

I believe everyone did their part according to the plan and contributed equally to the conclusion of our

project.
